SUMMARY

I'm a results-driven Unity Expert with 4+ years of experience and 40+ shipped projects across mobile (Android/iOS), AR/VR, and immersive platforms. I specialize in building scalable, high-performance interactive experiences from engaging gameplay systems to cutting-edge AI-driven simulations. My flagship achievement is Metame, an AI SDK that brings virtual characters to life with real-time conversation, lip-sync, and emotional expressions using NVIDIA microservices, WebRTC, and gRPC. My core expertise includes Unity/C# development, performance optimization, multithreading, mobile monetization, and multiplayer networked systems. I'm passionate about pushing the boundaries of AI-powered interactive experiences and bringing innovative concepts from idea to launch.

KEY ACHIEVEMENTS

Singapore Events (2024–2025)

Evolve Participations:

EQ (2024): Emotion-aware Android app demonstrating real-time empathy responses.

Comic Con (2024):

RuruSama - AI of real cosplay artist answering fan, art;
Cosmos - For Science Centre queries.

DFL (2024): *Guardian by the Bay* - Multilingual virtual ticketing agent for *Gardens by the Bay* with park info & bookings; *TryOn* - AR fashion app using Intel DepthSense.

GITEX (2025): *Noetic Learning* - AI expert avatar platform built on Metame; *Luma Tarot* - Magical AI app offering personal insights through interactive tarot reading.

Speak Ease (Mobile App)

an AI-driven bilingual translation app supporting 36+ language pairs, powered by NVIDIA microservices and gRPC-based streaming.

Unity Editor Toolkit

Built a Blendshape Recorder that stores and replays blendshape data through ScriptableObjects without animation clips.

EXPERIENCE

Lead Unity Developer

Evolve Innovation Solutions (EIS)

06/2024 Lahore, Pakistan

NEXT-Gen AI Solutions

- Architected **Metame**, a production-ready Unity AI SDK integrating ElevenLab, NVIDIA Riva, ACE, and Audio2Face with WebRTC/gRPC pipelines to power lifelike NPCs or agents with real-time conversational AI.
- Architected and launched **Speak Ease**, an Android translation app enabling real-time bilingual conversations across 36 language pairs using NVIDIA microservices for speech recognition, translation, and audio synthesis—built entirely in Unity
- Developed AI-powered virtual humans for interactive simulations, implementing real-time dialogue systems and expressive character behaviors that enhanced user engagement and training effectiveness.
- Built scalable AR/VR experiences for training, entertainment, and interactive storytelling, optimizing for Quest and mobile AR platforms.

Sr. Unity Developer

Big Heap Technology (BHT)

05/2022 - 06/2024 Lahore, Pakistan

Mobile App/ Game Development

- Shipped 25+ mobile games across FPS, GTA-style open-world, animal simulations, car parking, and vehicle riding genres with responsive touch controls.
- Optimized for 60fps on mid-tier devices and reduced APK sizes by 30-50% through asset compression and efficient rendering techniques.
- Delivered smooth, user-friendly experiences with intuitive UI, minimal load times, and optimized performance for extended gameplay.
- Implemented monetization strategies (Unity Ads, AdMob, rewarded videos, IAP) optimized for revenue and user retention
- Achieved over 1 million downloads on a single mobile title across Google Play and App Store.

Unity Developer

Intech Studio

05/2021 - 05/2022 Lahore, Pakistan

Provide Game Development Services

- Using Unity and C#, implementing core gameplay mechanics, UI systems, and touch controls.
- Created reusable game components and scripts following object-oriented programming principles to maintain clean, modular codebases.
- Collaborated with designers to rapidly prototype and iterate on game concepts, ensuring smooth gameplay and intuitive player experiences.
- Utilized Unity's physics engine, particle systems, and animation tools to build engaging game features and visual effects.
- Experienced with popular game development plugins including Invector character controllers, Game Creator Toolkit, Malbers Animal Controller, and Realistic Car Controller for rapid feature implementation

SKILLS

Unity 3D C# (OOP)

Gameplay Programming

AI Systems NVIDIA ACE

ElevenLab Integration

LiveKit Integration

Unity: WebRTC/ gRPC / REST

Unity Partical System

AR/VR Development

Mobile Game Optimization

Performance Profiling

HDRP / URP

Unity Custom Editor Tools

Unity Timeline

Unity Animation

Unity / Google Analytics

Addressables Unity UI/UX

Monetization (Unity Ads, AdMob, IAP)

Git Unreal Engine (Moderate)

C++ (OOP) Blender 3D

Blueprint Programing

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Hajvery University CGPA: 3.25

06/2015 - 07/2019

ICS Intermediate in Computer Science

Govt. Digree Collage

Sheikhupura
